Evening Presentation Notice

Date: **Tuesday, March 28th, 2023**

Time **17:30 – 21:00**

Location: **Café SAT**
6 Place du Marché
Montréal, Québec
G6V 4Z2
(Parking available on the nearby streets)

Organized by: Denis Bonneau

Sponsored by: Qumulo et DataIntell

Language: French

Subjects: **Analytics and unstructured data management for operations:
Exploring technology innovations that are transforming the media industry**

IMPORTANT: This presentation, open to all, will be available **in person only**.
Seating being limited, in order to participate to this event, you must register via [Eventbrite](#). No access will be possible without prior registration.

Your SMPTE-MTL committee is proud to team-up with Qumulo and DataIntell to present an evening on analytics and unstructured data management for operations: Exploring technology innovations that are transforming the media industry.

But before we start the evening, faithful to our habit, we invite you to a Happy Hour, from 5:30PM, to discuss and network and where food and one drink will be offered.

Evening Schedule:

5:30PM – 6:30PM: Networking

6:30PM – 7:15PM: Presentation, Pascal Filion and Olivier Rivard

The presentation will focus on the tools available in 2023 to help us understand unstructured data and manage it throughout its lifecycle, from creation to archiving.

Attendees will learn how next-generation storage solutions enable better data management and data integrity, as well as the importance of analytics tools to detect problems, optimize processes and make informed decisions.

7:15PM – 9:00PM: More networking

Biographies :

Pascal Filion

Pascal Filion is a systems architect at Qumulo, the next-generation file storage leader based in Seattle, USA. With over 20 years of innovative leadership in media and entertainment, technology, operations and information management, he is now dedicated to revolutionizing the unstructured file storage industry.

Experience: Moment Factory, Office national du film du Canada

Olivier Rivard

Olivier Rivard is CTO and co-founder of DataIntell, a technology company that provides a storage analytics solution for enterprise storage. He started working in the media and entertainment field as an IT administrator in 2012. With more than 10 years of experience in software development and DevOps, Olivier leads and develops with his team the DataIntell solution to simplify storage management for businesses.
