FUTURE OF CINEMA CONFERENCE

Now, Next, and Beyond the Yellow Brick Road.

The Future of Cinema Conference (FoCC) maps the path forward towards the technology horizon. The 2019 FoCC program includes the technical depth you expect and a broad, global perspective of diverse planes of thought. Join us for an exciting, thought provoking day and a half with the experts who are changing the very foundation of the Media and Entertainment industry.

Don't miss this year's keynote: [The Making of "Apollo 11" by Todd Douglas Miller](#)

Produced in partnership with:

April 6 - 7, 2019

[S222/S223, South Hall Meeting Rooms](#)

Registration Access

Open to Conference Flex and Conference Flex Session 3-Pack holders.

NAB 2019

	Monday, Apr. 8	Tuesday, Apr. 9	Wednesday, Apr. 10	Thursday, Apr. 11
9:00 am		Show Opens	Show Opens	Show Opens
9:30 am		Implementing AES67 and ST 2110-30 in Your Plant (Wheatstone)	AMWA BCP-003 - NMOS API Security (BDC R&D)	The Basics of SMPTE ST 2110 in 60 Minutes
10:00 am	Show Opens	AES67 and ST 2110-30 Interoperability in Real Life (DirectOut)	NMOS API Authorization - How to Lock My Media Streams (Riedel)	(Telecom Product Consulting)
10:30 am	The Basics of SMPTE ST 2110 in 60 Minutes	Current Status of ST 2110 over 25 GbE (M3L)	Scalability and Performance of IS-04 and IS-05 and How TR-1001-1 Helps (Sony Europe)	Live Closed Captioning and Subtitling in SMPTE 2110-40 (EEG)
11:00 am	(Telecom Product Consulting)	Utilizing ST 2110 in ProAV Applications (PESA)	Securing Your Live IP Production Workflows - Freeing Your Creativity (Arista)	Network Automation Using Python and Google Sheets (EBU)
11:30 am	A Simple Description of SDP in SMPTE ST 2110 (Embrionix)	Audio Handling in an IP Studio Environment (Neveion)	NMOS IS-07 - GPI Replacement and Much, Much More... (Pebble Beach)	Transporting ST 2110 over WAN Update (Neveion)
12:00 pm	JT-NM Qualification Event (EBU)	ST 2110-30 and NMOS IS-08 — Audio Transport and Routing (ALC Network)	Monitoring and Measuring IP Media Networks (Tektronix)	Military Grade Security for Video over IP (Nextera Video)
12:30 pm	Building Scalable Systems Using SMPTE ST 2110 (Imagine Communications)	Routing 'Mono' Audio from Multi-Channel Streams (Imagine Communications)	High-Precision Capturing and Measuring of 2110 Streams Using Commodity IT Equipment (EBU)	JPEG-XS and ST 2110 (intoPIX)
1:00 pm	CASE STUDY: PlazaMedia IP-based Broadcasting Centre (Neveion)	CASE STUDY: ST 2110 From Theory to Reality, Full ST 2110 UHD/HDR OB Van (tpc)	CASE STUDY: NEP UK ST 2110 Production Environment (Grass Valley)	A Study of Protocols for Low-Latency Video Transport Over the Internet (Cobalt Digital)
1:30 pm	CASE STUDY: ORF on Building a Large OB Truck With ST 2110 (BFE)	CASE STUDY: Telemundo On-Air with ST-2110 (Evertz)	CASE STUDY: ST 2110 UHD HDR buildout at QVC Japan (Diversified and Imagine)	No Presentations
2:00 pm	Panel Discussion All-IP Success Stories — Real World Deployments Moderated by Matthew Goldman (MediaKind)	The Basics of SMPTE ST 2110 in 60 Minutes (Telecom Product Consulting)	SMPTE ST 2110 - Practical Lessons Tony Orme Broadcast Bridge	Show Closes
2:30 pm				
3:00 pm	AMWA NMOS: The Whole Story (BBC)	Keeping Time with PTP (Tektronix)	Red and Blue, or Purple: Your IP Media Network, Your way (Arista)	
3:30 pm	Scalability and Performance of IS-04 and IS-05 and How TR-1001-1 Helps (Sony Europe)	Aligning Streams in ST 2110 or How to Manage Lip Sync (Imagine Communications)	A Performance Measurement Study of the Reliable Internet Stream Transport Protocol (Cobalt Digital)	
4:00 pm	AMWA NMOS Identity and Timing (BBC)	PTP Management and Media Flow Monitoring for All-IP Infrastructures (Skyline Communications)	Connection B/Rate Optimization Technique for Multi-Stream Distribution Over IP Networks (VideoFlow)	
4:30 pm	TR-1001: Replacing Video-By-Spreadsheet (EEG)	Synchronization of ST 2110 Streams (ALC Network)	User Requirements Beyond ST 2110 (EBU)	
5:00 pm	AMWA NMOS IS-04 and IS-05: Things You Might Not Know (BBC)	Using PTP / SMPTE 2059: A Practical Experience Perspective (Telos Alliance)	A New Approach to Media Delivery: Embracing the Attributes of IP Cloud (MediaKind)

JT-NM Tested

[Download the NAB 2019 JT-NM Tested Catalog \(Apr. 2019\)](#)

The JT-NM Tested Program (April 2019)

The JT-NM Tested program offers prospective purchasers of IP-based equipment greater, more documented insight into how vendor equipment aligns with the SMPTE ST-2110 and SMPTE ST-2059 standards. The JT-NM Tested Catalog documents the test procedures, test equipment and results of the JT-NM Tested event that was held during the week of March 18, 2019 at the Fox Networks facility in The Woodlands, TX, USA. This program is not a certification program; rather it is a snapshot in time of how vendor equipment conforms to key parts of SMPTE standards, providing prospective purchasers and users with a reference as they begin their equipment evaluation and qualification process.

The Joint Task Force on Networked Media is led by the following JT-NM Admin Group members:
