**SUBJECT:** **RED One Camera Demonstration - An Overview of the design and function of the RED camera, and 4K Production and Workflow**

---

The RED camera promised to revolutionize the process of digital filmmaking since its first introduction as conceptual "balsa-wood-ware" at NAB 2006. Since then, it has evolved into a "real" product doing real work, and it presents new challenges in acquisition and post production. New hardware and software products and enhancements were introduced at this year's NAB.

Veteran Director of Photography Larry Trinkaus and Staff from Grace and Wild Studios will go through the operation of this 4K camera and its workflow. Grace and Wild Studios will also host this event. Come and join colleagues and friends for an interesting and perhaps inspiring evening.

Refreshments and film SWAG will be served.
