SUBJECT: Uncompressed Surround-Sound Server Technology

Though Enco's product line consists of server-based digital audio recording and playback systems, they keep their eye on the needs of television. One of the latest offerings of their DAD and DADtv systems support uncompressed 5.1 and 7.1 surround sound streams. The DADtv is being used at television installations such as QVC, The Dr. Phil Show and Entertainment Tonight. Enco's engineers will give us a presentation on the workings of their surround sound servers.

Managers' Dinner is at 5:30 PM at Fishbone's Rhythm Kitchen, 29244 Northwestern Hwy., Southfield. (248) 351-2925
